# *IT IS AG - your IT partner with confidence*

Since its founding in 1999 we act as a national and international IT enterprise with headquarter in Altheim near Landshut. Please regard us at your consulting, solutions implementation and service expert for business software. We also have excellent know-how in security and operator of our own datacenter.

We are specialized in business solutions and pick the best for you. We run your database, your webshop, your mail-, data- and terminalserver or just your website professional, cost-efficient and safe. Since we operate in the region, your data will stay safe and secure closeby. Come along and see our certified facilities for yourself.

As a systems provider we are specialized in dedicated, high quality hardware and best of breed software solutions. We run what we recommend, so there is a great amount of experience with those solutions. IT IS offers honest and dedicated consultancy, efficient implementation and smooth operations with systems administration at first hand.

# Odoo - Open Source Business System

Odoo is a versatile, completely integrated enterprise system for resource planning, financial management, production management, service management and much more. Odoo is easy and intuitive to handle and depicts your business processes clearly on a web based platform. With its high dissemination and the modular architecture you can expand the system with no hassle. It is either free of charge or has a nominal fee.

Unlike most other solutions, you can securely cross the borders of the enterprise and invite your business partners to work together with you - due to the browser based solution. Use webpage, shop, support portal and applicants portal on the outside and the business apps internally: all that works nicely in every place and every time - and on all common devices.

With IT IS you profit from over 18 years of ERP experience and more than 325 successful projects. Our specialists will consult you before, during and after the implementation close to standard, yet aligning to your individual needs with full commitment and provide you with the best business solution possible.

**Experience new efficiency and optimize your processes  
to increase the return of investment in your digital company**

**odoo tools**

A full toolset of  
sales assistance.  
These are nice  
helpers showing  
sales history,  
undo changes  
and help with mail

**Alfresco**

The perfect  
match: Connect  
this Document  
management with  
Odoo to put all  
relevant files with  
business infos

**FixAddress**

Fixation of  
address data in  
posted receipts  
to secure them  
from changes of  
partner data in  
Odoo

**ZUGFeRD**

Legally adjusted,  
coherent shape  
for electric  
invoices and  
their processing  
in different  
institutions

## Your desired module is not enclosed?

We gladly develop a custom module for your particular need.

# Alfresco - Document-Management-System

Alfresco is a enterprise-class document management system for mid-size organisations.

The web based solution of Alfresco is easy to handle, self-explained and provides a much better way to deal with files than older ECM solutions.

It has a large number of dedicated interfaces ranging from fileshare and ftp to WebDAV and E-mail channels

It comes with an integrated workflow engine for the administration of complex business processes

Its customizable front-end makes up for easy cooperation with internal and partnering coworkers

The system can be put up as a long-term storage that provides compliance with regulations in western countries

Alfresco is available as a community version as well as enterprise version and has a mobile client, too

# *IT IS AG - your reliable systems partner*

## **The IT IS systems department loves to take care of your IT:**

Consulting, sourcing and setup of hard- and software

Know-How-transfer and training of your employees

Allocation of your solution in our own datacenter  
(your data stays in the region)

Inspection and improvement of the security and safety of your  
inhouse IT infrastructure

Reliable administration, maintenance and operation of your network

Tune-up and repair of your PCs, Servers and devices

**As regional supplier we are always nearby if  
you need our support – fast and without hassle.**

# *Security in your own network - and in our in-house datacenter*

In times of data espionage and daily news about data piracy it is soothing to know where the own private data is managed and that it is in a safe harbour.

A multi-connection via fiber- and copper wire to the Internet provides the base of the IT IS data center.

We ensure a very high QOS with doubled infrastructure in every stage of the flow on routing, switching and firewalling, thus ensuring high reliability and safety. The servers we run are either built as 16 or 24 ways IBM server or Blade Centers. We put them in cluster organizations to avoid any down times and load them with advanced virtual technologies based on containers or provide them as regular direct access machines, too.

The solution scales as required by provisioning further blades or V-servers. For bigger projects dedicated servers are in use and can scale out upon your needs. The software base is mostly Linux (Debian, Ubuntu) and FreeBSD. We also operate Windows based servers upon your request, and can provide HyperV or VirtualBox as virtualization.

# Creating and hosting of your websites

An Internet presence and a shop for business customers and consumers is a must-have for all companies today. But is your site still a eycatcher? We gladly help you with our more than 18 years of experience in e-commerce and e-business - your display window for the world shall attrack your clients.

We gladly show you our reference projects and consult you individually and competent at reshaping your website. Tell us your wishes and we will implement them with know-how and in a short time. We also undertake the hosting of your finished website.

## Discover the new generation of self guided content management

# Microsoft Project capabilities of IT IS AG

## SharePoint Projects

The SharePoint portal enables your company to develop an intelligent portal which connects employees, teams and business processes.

The direct collaborations is simplified by merging persons and teams with information. Dates can be organized and data can be searched.

**IT IS can shape your SharePoint the way you want an need it. Test us with regards to your particular demand.**

## BizTalk Projects

With the IT IS connect solution or Microsoft BizTalk you can realize your whole electronic communication with customers and suppliers.

The electronic exchange of data like invoices, orders or special documents of your commodities will ease your work ten fold. The management of structured data directly from your system to a remote system saves you huge amounts of time. You will be amazed how much money you can recoupe with such solution.

## E-Commerce Projects

IT IS has already maintained and implemented many different projects for web based trade like webshops, completely integrated in business solutions. B2B portals, customer's portals and Shop-in-Shop systems are our home.

Keep an eye on IT IS web whichs connects the webshop and webportal solution with ERP systems Microsoft Dynamics NAV and AX.

**We are weighting the best approach on the web for you**
